Individual Gardens

- A Herb garden** – contains over 200 plants with a variety of culinary and medicinal uses.
- B Exotic Garden** – opening June 2011, a Cuban style garden showing how people grow as much food as possible in a small space with limited resources.
- C Flowers for Pleasure** – enclosed by a holly and beech hedge, this garden contains bulbs and perennial flowers for colour, scent and cutting.
- D Rose Garden** – provides wonderful scent in the summer months and contains varieties that are resistant to blackspot and mildew.
- E The Mount** – an ideal place to view the whole site.
- F RSPB Wildlife Garden** – is designed to offer food for birds all year round through the choice of plants and the insects they attract.
- G Craftsman's Trees** – this area contains 21 different trees which had important uses in the past
- H Paradise Garden** – is split into 2 parts, a town and country garden
- I Biodynamic Garden** – opened in 2007 it was the first and only of its kind open to the public.
- J Small Organic Garden** – was originally made for Channel Four's "All Muck and Magic" series, it shows how even a small space can be both productive and attractive.
- K All Weather Garden** – shows how you can grow a variety of vegetables all year round.
- L Allotment Garden** – shows food-growing, crop rotation, together with pest and disease control.
- M Bee Garden** – all the plants are attractive to bees and have been chosen to provide flowers over a long season and show the essential role bees play in pollinating many fruit and vegetable crops.
- N Fruitful Schools Orchard** – planted in 2010 the orchard contains rare local fruit trees including the three Warwickshire apples.
- O Compost and Soil Fertility** – is a display on how to look after your soil, compost bins, wormery and green manures.
- P Soft Fruit Garden** – contains many different varieties of raspberry, gooseberry, red currant, blackcurrant Logan berry and many more.
- Q Bee Apiary** – see the beehives close up with the help of The Coventry Beekeepers.
- R Top Fruit Gardens** – contains apples, pears, plums, quince, medlars and cherry trees.
- S Woodland Garden** – a tranquil garden with many unusual woodland plants, including edible plants suitable for shade.
- T "Growth" Therapy Garden** – promotes gardening for people with disabilities and the garden makes the most of raised beds and aromatic plants.
- U Memorial Garden** – dedicated to our founder Lawrence D. Hills and his wife Cherry, this garden was built for people with visual impairment.
- V Children's Garden** – a place for them to let off steam with musical instruments, a willow tunnel and Swiss Style Chalet playhouse.
- W Cook's Garden** – features unusual herbs, vegetables and fruit. Some part of every plant in this garden is edible.
- X Low maintenance planting** – this area demonstrates an alternative and imaginative approach to planting large areas of land requiring minimum maintenance.
